PROFESSIONAL SUMMARY

Results-driven QA Automation Engineer with 3+ years of experience in Selenium (Java), Cypress (JavaScript/TypeScript), REST API testing, SQL validation, and manual testing within the healthcare/insurance domain. Delivered 150+ automated test cases across web, mobile, and AI-based systems, significantly reducing manual regression effort. Proven track record leading end-to-end test cycles in Agile/Scrum environments, using JIRA for defect tracking and GitHub for version control, collaborating with client stakeholders to ensure zero defect spill-over across every release.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions — Cigna Healthcare

Nov 2022 – Present

Associate – QA Automation Engineer | Promoted Sep 2025

- Promoted based on strong performance; own full regression suite execution and lead Cypress automation scripting across multiple release cycles.
- Coordinate with client stakeholders via JIRA and daily Scrum to track deliverables, clarify requirements, and achieve zero defect spill-over at every release.

Programmer Analyst – QA Engineer | Nov 2022 – Sep 2025

- Built 100+ Cypress automated test cases across multiple modules, including end-to-end validation of AI chatbot features, with CI/CD pipeline monitoring.
- Developed 50+ Selenium-Java (TestNG) automation scripts for UI flows and REST API validations, improving regression coverage for core modules.
- Led manual & UI testing for Web Page Redesign; used SQL for backend data validation and JIRA for defect tracking — received formal client appreciation at closure.
- Supported Native Mobile App release with manual testing on Android/iOS via BrowserStack and Postman API validation; tracked 30+ defects through to resolution.
- Performed in-sprint UI & API automation, managed test cases in JIRA, and monitored AWS CloudWatch logs to support QA sign-off across all environments.

TECHNICAL SKILLS

Automation Tools	Selenium WebDriver (Java), Cypress (JavaScript, TypeScript), TestNG
API Testing	REST API, Postman, JSON/XML Validation
Programming	Java, JavaScript, TypeScript
Database	SQL, DbVisualizer (backend data validation)
Tools & DevOps	JIRA, Git, GitHub, BrowserStack, AWS CloudWatch, CI/CD Pipeline Monitoring
Methodologies	Agile, Scrum, Regression Testing, In-Sprint Automation, Stakeholder Management

EDUCATION

Nitte Meenakshi Institute of Technology, Bangalore

Aug 2018 – Jun 2022

B.Tech – Information Science & Engineering | CGPA: 8.3 / 10

Oxford Public School, Ranchi

Mar 2016 – Mar 2017

Class XII – CBSE (PCM) | 86.8%

ACHIEVEMENTS

- Recognized as a top performer multiple times for consistently exceeding performance expectations and delivering exceptional results.
- Received **Impact Award** of 250 points for outstanding contribution to projects and consistently going above and beyond commitments.
